

Site Name:

The Weather People

(<https://alfharbich.github.io/assignments/lesson-11/index.html>)

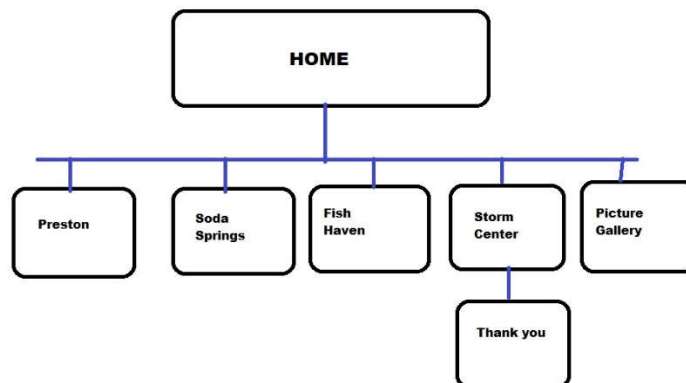

Purpose of site:

To help people keep update on current weather, upcoming weather, current date and time, upcoming events. Provide convenient links to national weather services

Audience:

- Local residents who wish to plan activities for the day
- Tourists and travelers who plan on visiting the area and would like to be prepared for the weather
- Prospective new residents who are contemplating moving to the area and want to get an idea what the local weather is like
- Personnel in charge of event planning who need to schedule events according to weather conditions
- Commuters whose travel times might be affected by the weather

Site Map:

Color Scheme:

The basic color of the web page will be:

rgb(190, 238, 212)

The light blue will remind the user of the sky and is easily associated with weather.

The text of the page will be Black (#000000) with navigational links red (#FF0000), which will turn yellow (#FFFF00) once activated.

Typography:

The title and motto will be displayed in Noto Sans JP, which will add a modern touch. The rest of the page will be in Arial Nova, which is an easy to read sans-serif font.
